

## Features

---

- Heavy duty die-cast aluminum construction
- Designed to hold devices with 100mm VESA mounting pattern or 63.5mm mounting pattern typical with RFID antennas
- 45 lbs weight capacity
- Bracket articulates in both vertical and horizontal planes
- Dual design allows the bracket to be wall or pole/mast mounted
- Can be mounted to poles from 1" to 3" in diameter or poles up to 17.5" in diameter using optional adjustable mounting bands

## Description

---

The **Altelix HAA-V01** is a heavy duty indoor and outdoor rated adjustable mounting bracket ideal for use with any device with a 100mm VESA mounting pattern or 63.5mm mounting pattern (typical in RFID antennas). This includes enclosures, antennas, LCD computer displays and monitors, televisions and speakers. Constructed from heavy duty die-cast aluminum, this bracket is designed to articulate in both vertical and horizontal planes. This allows for precise adjustment and aiming of the attached device. An ideal alternative to the HDMNT-100MM mount, the Altelix HAA-V01 can hold devices up to 45 lbs.

The HAA-V01 is designed for both wall and pole/mast mounting. It can be mounted to poles and masts ranging from 1-3 inches in diameter. Using the optional adjustable stainless-steel bands available from Altelix, it can mount to poles up to 13 inches in diameter.
