

The Altelix NF100808 NEMA enclosure is ideal for protecting equipment from harsh environments and tampering. The rugged unit is molded from fiberglass reinforced polyester, FRP. With the optional thermostatically controlled heater, sensitive equipment can operate outside it's normal operating range. Equipment designed for indoor use can now be located outside. The unit's door has a gasket to protect from water ingress. The door also features stainless lockable clasps and hinge.

Features

- Water resistant design
- Fiber Reinforced Polyester, FRP
- Optional AC power with receptacle
- Optional Heater
- Stainless Steel Latches with Padlock hasps

Applications

- Outdoor WiFi installations
- SCADA, Remote Terminal Unit
- Security and surveillance systems
