## Description

The **Altelix NP120905VFA1C-0** features two 2¼" inch air vents and a thermostat-controlled cooling fan. It is ideal for protecting small devices from harsh environments and tampering, while allowing ventilation for installed equipment or batteries. It is designed for applications that do not require internal AC power outlets.

**Construction and Features** - This enclosure is molded out of UV resistant Polycarbonate + ABS, an industrial grade plastic with greater strength and durability than standard ABS. It features a gasketed hinged door with dual latches, a stainless-steel security screw and provision for padlock. Integrated mounting feet simplify installation.

**Cooling Fan Ventilation** - The NP120905VFA1C-0 features two 2¼" inch air vents and a thermostat-controlled cooling fan. The low noise, high airflow fan helps maintain lower internal temperatures. Rain shrouds on the front door keep rainwater from entering the enclosure.

**120VAC Power** - This configuration consists of the PC+ABS NEMA enclosure with hinged lid and a 1.5mm thick aluminum plate with a 120VAC power terminal block which can be used to hardwire equipment power cords. A 5 foot pre-wired power cord is included to power the enclosure, so no additional wiring is required.

**Complete with Cable Grommets, Cable Glands and Wire Management Accessories** - For convenience, the included accessory kit contains wall anchors, zip ties, hook-and-loop wire management straps, door locking key and more.
