Description

The Altelix NP12FA1-APV1 Enclosure is a weatherproof fan-cooled enclosure designed to provide indoor or outdoor protection for the Apple TV® 4K player.

Install Your Apple TV® 4K Securely Outdoors

This sleek enclosure is molded out of UV resistant Polycarbonate + ABS, an industrial grade plastic with greater strength and durability than standard ABS. It features a gasketed hinged door with dual latches, a stainless-steel security screw and provision for padlock. Integrated mounting feet simplify installation. It meets or exceeds NEMA 3R, 3RX and IP24.

Apple TV® 4K Mounting Cradle

The NP12FA1-APV1 features a mounting cradle specifically designed for the 3rd Gen Apple TV® 4K box. Installation is easy, simply slide the Apple TV® 4K player into the cradle. For installations subject to vibrations, an optional hook and loop strap is provided to secure the Apple TV® player in the cradle. The cradle is designed so that it will not interfere with any of the ports on the Apple TV® 4K player such as power and HDMI.

Plug and Play Setup

The NP12FA1-APV1 enclosure provides easy plug-n-play installation. Once the Apple TV® 4K player is securely mounted inside the enclosure, connect its power supply to the internal 120VAC power outlet. A cable gland and cable grommets on the enclosure allow cables to be connected to the device. Simply plug the enclosure's 5 foot power cord into an outdoor outlet and you are up and running.

Cooling Fan Ventilation

To help keep your Apple TV® player running cool, the NP12FA1-APV1 features two 2¼" inch air vents and a thermostat-controlled cooling fan. The low noise, high airflow fan helps maintain lower internal temperatures. The fan turns on when the internal temperature reaches 100°F (38°C) and turns off when it drops to 79°F (26°C). The fan is wired internally so it does not require use of the AC outlet. Rain shrouds on the front door keep rainwater from entering the enclosure.

Complete with Cable Grommets and Glands and Wire Management Straps

For convenience, the included accessory kit contains cable grommets and glands, wall anchors, zip ties, hook-and-loop wire management straps, door locking key and more.

Mounting

The mounting feet on the NP12FA1-APV1 allows it to be easily wall mounted with the included hardware. A pole mounting kit is also available for this enclosure.

Accessories

Model		Description
NMKG-150-08	 The image shows a grey rectangular enclosure with two metal mounting brackets attached to its sides. The brackets are made of galvanized steel and are designed to wrap around a pole to secure the enclosure.	The Altelix NMKG-150-08 Pole Mount Kit easily attaches to the enclosure. This pole mount kit allows the enclosures to be mounted to poles up to 7.6 inches in diameter. The mounting brackets are constructed from 0.04" (1mm) thick galvanized steel for all weather applications.
HN-0004	 The image shows a small, silver-colored metal key with a U-shaped head and a cylindrical shaft.	Replacement door locking key.
