## Description

---

The **Altelix NP151005VM** features two 3" inch air vents covered by rain shields, with cleanable screens. It is ideal for protecting small devices from harsh environments and tampering, while allowing ventilation for installed equipment or batteries.

**Construction and Features** - These enclosures are molded out of UV resistant Polycarbonate + ABS, an industrial grade plastic with greater strength and durability than standard ABS. It features a gasketed hinged door with dual latches, a stainless steel security screw and provision for padlock. It meets or exceeds NEMA 3R, 3RX and IP24.

**No-Drill Non-Metallic Equipment Plate** - This configuration consists of the PC+ABS enclosure with hinged lid and a 1/4" thick non-metallic PVC plate for mounting and securing equipment. Due to the "No-Drill" design of this PVC plate, mounting radios and other equipment can be done simply by using self-tapping screws.

**RF Transparent Design** - The NP151005VM is ideal for WiFi applications. The non-metallic design of both the enclosure and equipment mounting plate will not interfere the radio's operation. The size of this enclosure will fit a wide range of popular wireless points on the market.

**Complete with Cable Glands and Wire Management Accessories** - This enclosure includes 4 weatherproof cable glands. Simply punch out the seal, run your cable, and hand tighten for a water-tight seal. For convenience, the included accessory kit contains wall anchors, zip ties, hook-and-loop wire management straps, door locking key and more.
