## Description

---

The Altelix NP17AV-YBT2 Enclosure is a weatherproof enclosure designed to provide indoor or outdoor protection for the Wyebot® WIS4200 access point.

**Install Your Wyebot® WIS4200 Securely Outdoors** - This sleek enclosure is molded from weatherproof UV resistant PC+ABS, a high-tech thermoplastic blend of polycarbonate and ABS, for extreme durability. The door features reinforced hinges, dual latches and a tamper-proof locking screw with key to secure the enclosure. The wall mounting screws are concealed securely within the enclosure to prevent tampering. There is also a provision for a padlock.

**WIS4200 Mounting System** - The NP17AV-YBT2 features a versatile adjustable mounting system that allows you to easily install the WIS4200 inside the enclosure. This mounting system will not interfere with any of the WIS4200 ports such as Ethernet and power cables.

**Plug and Play Setup** - The NP17AV-YBT2 enclosure is intended for installations using PoE (Power-Over-Ethernet) to provide power to the WIS4200. Once the WIS4200 is securely mounted inside the enclosure, run the Ethernet cable (not included) into the enclosure via the cable gland and connect it to the Ethernet port on the WIS4200.

**Mounting** - The NP17AV-YBT2 enclosure can be wall mounted using the included wall anchors. An optional pole mount kit is also available for mounting on poles or fence posts.
