Description

The **Altelix TBP14** is a NEMA 4X Weatherproof Enclosure ideal for deploying service and emergency telephones in outdoor locations and harsh environments such as in schools, on pool decks, golf courses, loading docks, public buildings and commercial properties.

This durable NEMA 4X enclosure is molded out of UV resistant PC+ABS, a high tech blend of polycarbonate and ABS which combines the best qualities of both into a single material. PC+ABS enclosures maintain high toughness, durability, and dimensional stability even at extreme cold and hot temperatures. The door is gasketed for use in dusty or wet areas.

Inside features an aluminum mounting plate with a standard RJ11 telephone wall mount jack. An aluminum wire cover and cable grommet are provided on the bottom of the enclosure for the telephone wire.

Mounting - This enclosure features (4) external mounting feet which can be used for wall mounting or with our optional pole mounting kit. Mounting points are also provided inside the enclosure. These can be easily drilled out and used for applications requiring a more secure installation.

Labels - The TBP14 is available with either a red and white Emergency Phone label or a green and white Service Phone label. Applied to the enclosure door, these labels are weatherproof and UV resistant.
