- Includes Wall Mount Hardware and cable gland
- Optional pole mounting kit available

Description

The **Altelix Weatherproof Emergency Cell Phone Enclosure** is ideal for deploying emergency cell phones in indoor or outdoor locations without access to wired landlines.

New Life for Old Cell Phones

Most old cell phones which are no longer subscribed to or supported by a specific carrier can still call 911 services. This makes them ideal as emergency only phones. The Altelix Emergency Cell Phone Enclosure is designed for just that purpose.

Plug and Play Setup

The Altelix TBP emergency cell phone enclosure provides easy plug-n-play installation. A magnetic cell phone mount is provided for use with any cell phone. Once the cell phone is installed, connect its charging cable (not included) to either the USB-A or USB-C charging ports located on the power outlet. For 120VAC phone chargers, (2) 120VAC power outlets are provided. Once the phone is connected simply plug the enclosure's 5 foot power cord into any outlet and you are up and running.

Rugged Construction for Outdoor Use

This durable NEMA 3X enclosure is molded out of UV resistant PC+ABS, a high-tech blend of polycarbonate and ABS which combines the best qualities of both into a single material. PC+ABS enclosures maintain high toughness, durability and dimensional stability even at extreme cold and hot temperatures. The door is gasketed for use in dusty or wet areas.

Mounting

The enclosure can be wall mounted using the included anchors. The mounting hardware is concealed within the enclosure for a finished appearance and enhanced security. An optional pole mount kit is also available.

Emergency Phone Label

This enclosure features a red and white weatherproof UV resistant Emergency Phone label on the door.
